

untitled architecture is a team of independent architects united together to create beauty and quality of space, as well as the objects within it, regardless of names and labels.

Founded by Bogdan Peric and Andrey Mikhalev, it is an international office currently based in Milan, collaborating with different professionals in the sphere of art, architecture and design.

The office works with different types and scales of projects - from product design and architecture to the urban strategies and research.

untitled architecture has taught at several architectural schools and regularly participates and organises different international public events: lectures, panel discussions, workshops and exhibitions.

Among the completed projects are: Kysh Temporary [2023], Spazio Permano [2022], Press office Ground [2021], Private apartment in Milan [2019], etc.
